Guidelines for series approval of products for

Sealed secondary Cells / Batteries containing Alkaline or other Non-acidic Electrolyte for use in portable application

Product	Up to a range of capacity rating will be accommodated in the series, Provided
Battery	• Same nominal voltage • Cells of same construction design • Same electrodes / Electrolytes
Cells	• Same nominal voltage • Same construction design • Same electrodes / electrolytes

Guidelines for Quantitative Selection of Samples

- A series may consist of 19 models.
- Unless specified otherwise, one sample may be tested for each series.
- In any of the above consideration, worst case configuration from Safety Design perspective must be selected for testing.
